REPORTING ON SETTING UP A COMPUTER NETWORK TO THE NEW REGIONAL DIRECTORATE OF FINANCES OF BOUAKE (CÔTE D'IVOIRE)

Reference and purpose

Following an executive order, number 363-16 of January 16th 2016, establishing the regional directorates of the economy. Instructions were given to the IT and maintenance department of General Directorate of Finances / Ministry of Economy of Finances, during a management committee to set up the computer network to the new regional directorate of finances of BOUAKE (CÔTE D'IVOIRE).

The methods

1. We carried out a technical study in BOUAKE offices, to identify various essential elements such as:

- the approximate number of staff assigned;
- the number of directorates and sub-directorates;
- the different types of computer network equipment.

2. We met with the different suppliers to produce an invoice, giving the global cost of the project, which we transferred to the hierarchy.

Findings or results

1. the General Director of the Economy, instructed the stage manager to execute the budget in order to finance work.

2. The IT Department and maintenance has deployed its agents to carry out the work. These works were supervised by the department in charge of quality and standardization.

Financial implications

The global cost of *setting up a computer network to the new regional directorate of finances of Bouake* are estimated at **62.000.000 F CFA.**

Conclusions and recommendations

Nowadays, every administration has to be in the digital age.

It is in this momentum that the General Directorate of the Economy decided to setting up a computer network to the new regional directorate of finances of Bouake to allow to be interconnected at the General Directorate of Abidjan.

We suggest that the capacity of regional directorate of finances of Bouake be increased by 2020 with new computer, printer, scanner, data bank, etc.
